[MOBI] Tobacco Kentucky

Right here, we have countless ebook tobacco kentucky and collections to check out. We additionally provide variant types and furthermore type of the books to browse. The all right book, fiction, history, novel, scientific research, as capably as various other sorts of books are readily straightforward here.

As this tobacco kentucky, it ends happening bodily one of the favored books tobacco kentucky collections that we have. This is why you remain in the best website to look the incredible books to have.

Tobacco and Kentucky - W. F. Axton - 2021-10-21
For centuries before Europeans came to the New World, tobacco had an important role in the religious and social life of the early peoples of Kentucky. W.F. Axton describes the various forms in which tobacco has been used, its quick adoption by the Old World, and its gradual development into the forms common today, especially the blended cigarette. Little has been written about the place occupied by Burley leaf in the economic life of the Commonwealth, where tobacco is still the most important crop. Tobacco in Kentucky is accompanied by charts and maps illustrating the many aspects of tobacco production.

**Burley** - Ann K. Ferrell - 2013-07-01

Once iconic American symbols, tobacco farms are gradually disappearing. It is difficult for many people to lament the loss of a crop that has come to symbolize addiction, disease, and corporate deception; yet, in Kentucky, the plant has played an important role in economic development and prosperity. Burley tobacco—a light, air-cured variety used in cigarette production—has long been the Commonwealth's largest cash crop and an important aspect of regional identity, along with bourbon, bluegrass horses. In *Burley: Kentucky Tobacco in a New Century*, Ann K. Ferrell investigates the rapidly transforming process of raising and selling tobacco by chronicling her conversations with the farmers who know the crop best. She demonstrates that although the 2004 "buyout" ending the federal tobacco program is commonly perceived to be the most significant change that growers have had to negotiate, it is, in reality, only one new factor among many. Burley reveals the tangible and intangible challenges tobacco farmers face today, from the logistics of cultivation to the growing stigma against the crop. Ferrell uses ethnography, archival research, and rhetorical analysis to tell the complex story of burley tobacco production in twenty-first-century Kentucky. Not only does she give a voice to the farmers who persevere in this embattled industry, but she also sheds light on their futures, contesting the widely held assumption that they can
of raising and selling tobacco by chronicling her conversations with the farmers who know the crop best. She demonstrates that although the 2004 "buyout" ending the federal tobacco program is commonly perceived to be the most significant change that growers have had to negotiate, it is, in reality, only one new factor among many. Burley reveals the tangible and intangible challenges tobacco farmers face today, from the logistics of cultivation to the growing stigma against the crop. Ferrell uses ethnography, archival research, and rhetorical analysis to tell the complex story of burley tobacco production in twenty-first-century Kentucky. Not only does she give a voice to the farmers who persevere in this embattled industry, but she also sheds light on their futures, contesting the widely held assumption that they can easily replace the crop by diversifying their operations with alternative crops. As tobacco fades from both the rapidly transforming process diversifying their operations with alternative crops. As tobacco fades from both the physical and economic landscapes, this nuanced volume documents and explores the culture and practices of burley production today.

Burley - Ann K. Ferrell - 2013-07-01
Once iconic American symbols, tobacco farms are gradually disappearing. It is difficult for many people to lament the loss of a crop that has come to symbolize addiction, disease, and corporate deception; yet, in Kentucky, the plant has played an important role in economic development and prosperity. Burley tobacco—a light, air-cured variety used in cigarette production—has long been the Commonwealth's largest cash crop and an important aspect of regional identity, along with bourbon, bluegrass music, and Thoroughbred horses. In Burley: Kentucky Tobacco in a New Century, Ann K. Ferrell investigates the
developments in tobacco landscapes, this nuanced volume documents and explores the culture and practices of burley production today.

**Tobacco Culture** - John van Willigen - 2021-10-21
Whereas most crops drive farmers apart as they compete for the best prices, the price controls on tobacco bring growers together. The result is a culture unlike any other in America, one often forgotten or overlooked as federal and state governments fight over the spoils of the tobacco settlement. Tobacco Culture describes the process of raising a crop of burley from the perspective and experience of the farmers themselves. In the process of gathering information for the book, the authors performed most steps in the tobacco production process, from dropping plants, burning seedbeds, topping, and cutting to stripping and baling the finished product. Van Willigen and Eastwood document both present practices and historical developments in tobacco landscapes, this nuanced volume documents and explores the culture and practices of burley production today.

farming at the very moment a way of life stands poised for dramatic change. In addition to growing practices, the authors found other common threads linking growers and tobacco producing regions. Where tobacco is grown, it often becomes the major cash crop and carries the health of the economy. Farmer Oscar Richardson states, "It's bread and butter. It's the industry of the community, the state as a whole. You take tobacco out of Kentucky and this farmland wouldn't be worth a nickel."

Combining cultural anthropology and oral history, John van Willigen and Susan Eastwood have created a remarkable portrait of the heart of the burley belt in Central Kentucky.

Ann E. Kingsolver -
by the movement of both
textile jobs and tobacco
production to other countries,
residents of Nicholas County
face an uncertain future.
Based on twenty-five years of
research, Kingsolvers
longitudinal ethnography of
Nicholas County, her home
community, synthesizes
geographical, historical,
economic, and political
processes that have shaped
lifeways and worldviews. She
documents the perspectives of
farmers, factory workers,
politicians, those pursuing
new niches in the labor
market, and middle school
students in search of
alternative futures.
Countering stereotypes,
Kingsolver emphasizes the
skills and agency of rural
residents and demonstrates
how people in widely
dispersed and seemingly
isolated communities in the
world are connected through
capitalist logic and practice,
thereby illuminating
globalizations far-reaching
effects.

Nick and Viola - Laura Muntz Derr - 2013-06 Nick and Viola is a family tragedy that illuminates a neglected period of Kentucky on three generations of the Muntz family. In 1899, Nick and Viola Muntz, landowners and tobacco farmers in the Bluegrass Region of Kentucky, had a bright future. By 1904 the American Tobacco Company (ATC), owned by James B. Duke, monopolized the market for tobacco and dropped prices below the cost of production. Populist groups formed to “pool” or hold tobacco off the market to force higher prices. Because pooling was voluntary, tensions arose between neighbors who pooled and those who didn't. Vigilante groups, known as “Night Riders,” attacked barns and crops, and sometimes even their neighbors who refused to pool. Nick and Viola and their relatives did not join the pool and suffered the consequences. A tobacco barn burned, a gunshot killed an innocent man, and a family fell apart. Nick and Viola transcends one family's story and becomes a symbol of the world of tobacco and the enduring spirit of a family.

The Tobacco Cutters and Other Stories of Northeastern Kentucky - Sam L. Bevard - 2010-03
Readers who are themselves authors have said of Sam Bevard’s previous books: “Beginning Again is a fine first collection of stories from a passionate countryman, gathered as he roamed the countryside embraced by the family farm in his beloved northeastern Kentucky” —Ron Ellis, author of Cogan’s Woods, editor of Of Woods and Waters. “The greatest compliment I can pay a writer of fiction is that the fiction reads true, real people in a real world, and Sam Bevard is that writer in Through the Back Gate. —Garry Barker, author of Kentucky Waltz (winner of 2007 Kentucky Literary Award for Fiction), Publisher of Flemingsburg Gazette. In this third collection of stories ranging...
from humorous to tragic to the supernatural, Sam Bevard presents an assortment of characters old and new including: Colonel Dale in his last and greatest conflict, intrepid WW II veteran Eli Mattson, determined to live on his own terms, and Peck Rackham, who in a dog finds the inspiration to reclaim a lost part of his life.

Tobacco Harvest - James Baker Hall - 2004

A photo near the end of Tobacco Harvest: An Elegy shows a crew of workers, looking weary but satisfied, leaving the barn after another long day of harvesting tobacco. As Wendell Berry says in his essay, these Henry County, Kentucky, neighbors gathered together whenever any of them needed the help of the others. This time-honored practice of swapping work was, Berry writes, "a good way to get work done"
A meditation on the shifting nature of humans' relationships with the land and with each other, Berry's essay laments the economic, political, and societal changes that have forever altered Kentucky's rich agricultural traditions. Berry also adds a deeply personal perspective to Hall's visual testimony. With a farm of his own nearby, Berry was a longtime friend and neighbor of the families shown in Hall's pictures and took part in their work swapping. In addition to detailing the repetitive, strenuous labor involved in harvesting a tobacco crop, he relates memories of stories told, laughs shared, meals savored, and brief moments of rest and refreshment well earned. Hall's photographs illuminate the characters and events that Berry describes. During the 1973 harvest, he photographed the rows stretching toward the horizon while laborers cut a tobacco crop, one plant at a time, until the last row was cut, hauled, and housed in the barn. These photographs convey the physical experiences of a Kentucky tobacco harvest: the heat of the sun, the dirt, and the people hard at work.
